

Port Operations Project

Case Study

Client: Port Operator, Operational Building (Confidential)

The Challenge:

The costs, on this new operational building had increased to £3.6m from the original £3.2m at Design Stage an increase of £400k some 12.5%.

Services:

Provide a qualified Value Management professional to plan and facilitate a Value Improvement workshop.

Solution:

Plan the workshop including agenda and attendees and then facilitated the workshop with all, focused on the identification of real value improvement opportunities. The Managing Director and Finance Director attended the workshop and the MD cleared their diary to attend the full day as they saw how beneficial the workshop was.

Results:

Through the expertise and focus of our highly skilled and experienced facilitator the workshop team identified potential savings of £800k, and delivered this post-workshop, a 22% saving.
