EVENT OVERVIEW

Value Factory: the active international online conference for Value Engineers and those who are interested in Value Engineering!

If you are a practicing value engineer then you will love this new way to connect with colleagues, share knowledge with experts, and stay connected with practitioners and users around the globe. The Value Factory is a lively event with lots of interactions, seminars, workshops, trainings, lectures, examples, networking possibilities and direct one-on-one meetings.

PEOPLE PROFILE

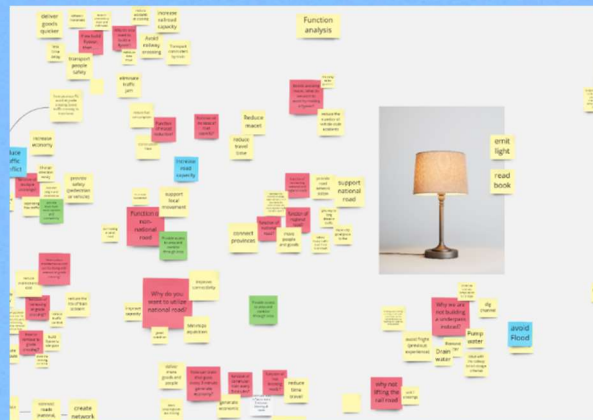

A new way to experience knowledge sharing

The event will run on Thursday 18 and Friday 19 February from 8-11h UTC (Amsterdam-Paris +1h/ Hong Kong – Kuala Lumpur +8h / Sydney +11h).

All you need is a desktop, laptop, tablet or phone and a web browser. No app downloads are required.

The Value Factory conference is of interest for everybody who owns, finances, uses or designs projects and systems. It is created by value engineers from around the globe. The Value Factory is meant for..

- ☐ Project owners
- ☐ Project and programme financiers
- ☐ Ministries
- ☐ Companies
- ☐ Non profit organisations
- ☐ Sectors: Manufacturing, Civil, Food, Process, Energy, Water professionals
- ☐ Project managers
- ☐ Project engineers
- ☐ Architects
- ☐ Education and training institutes
- ☐ Individual Value Engineers
- ☐ National value engineering organisations
- ☐ In low, middle and high income countries

ORGANISING MATTERS

ORGANISATION The Value Factory Conference is supported by national and international value engineering organisations and by individuals. Members from national and international bodies are encouraged to participate in the Value Factory.

ROOTS This initiative emerged from the Belt and Road value engineering group and is an alternative for physical value engineering meetings during and post Covid times around the globe. It aims to grow to an international network of professional value engineers in Africa, Asia, Australia, Europe, North America and South America with high quality at low cost. It has a very small CO₂ footprint.

PROGRAM Each Value Factory event has a vivid mix of speakers, networking event, interactive workshops and commercial training modules. See the latest agenda on the website.

Topics and contributions are to be reviewed by the organising members.

SPONSORSHIP Speakers and workshop facilitators have their own page on the conference website for their CV and provided services. Sponsors of the Value Factory earn their place on the front page of the Value Factory website. Supporting national and international engineering organisations earn their place on the front page of this Value Factory flyer.

Contributors to this event. This specific conference was organised with help from Hein de Jong, Michiel Skevofilax, Thera de Kramer.

WHERE AND WHEN TO REGISTER. COSTS

Registration desk for the February conference is open starting the 1st of January 2021 at the Value Factory Conference website (<https://www.eventleaf.com/ValueFactory-February2021>)
